EDUCATION

Jomo Kenyatta University of Agriculture and Technology (JKUAT)

Bachelor of Science in Electrical and Electronic Engineering

Juja, Kenya

Sep 2026 – Present

Moringa School

Software Engineering

Nairobi, Kenya

Feb 2026 – Aug 2026

EXPERIENCE

Software Engineering Trainee

Feb 2026 – Present

Moringa School

- Mastered full-stack web development across HTML, CSS, JavaScript, React, Python, and Flask - building real-world projects at every stage.
- Developed interactive front-end applications using React, including component-based architecture, state management, and API integration.
- Built secure REST APIs and relational database systems using Flask, SQLAlchemy, and JWT authentication.
- Completed a full-stack capstone project with a React frontend, Flask backend, and a relational database, solving a real business problem. *Nairobi, Kenya*
- Practiced core computer science fundamentals - OOP, recursion, and data structures (linked lists, stacks, queues, heaps) - while solving algorithmic problems using two-pointer, sliding-window, and binary search patterns

Software Developer & Data Entry Associate

Dec 2025 – Present

Perch Poultry

Nairobi, Kenya

- Maintained and updated production, sales, and inventory records in Excel, ensuring accurate day-to-day data entry for business operations
- Designed and built an M-Pesa STK Push (prompting) payment application integrating Safaricom's Daraja API to automate customer payment collection
- Organized spreadsheet structures and formulas to speed up reporting and reduce manual data-entry errors

PROJECTS

[Personal Portfolio Website](#) -> React, Three.js, React Three Fiber, CSS

2026

- Built a personal portfolio built from scratch with React and Vite - while remaining fast and responsive through aggressive code-splitting.
- Designed to be immersive, featuring a fully animated day/night sky, an interactive 3D globe, interactive parallax effect and glare card

[M-Pesa Prompting App](#) -> Python, React, Daraja API

2026

- Built a full-Stack M-Pesa payment application built with Safaricom Daraja API, featuring STK Push payments, real-time transaction status updates, callback handling, and seamless payment verification.
- Included a QR code generation feature which triggers when user enters an amount. A user scans the QR code using the M-Pesa App, this directs them to payment with auto-filled Paybill number and amount.

[Python CLI Project Manager](#) -> Python, OOP, Argparse

2026

- Built an object-oriented command-line app for managing users, projects, and tasks.
- Designed using custom persistence classes to serialize data to and from a local JSON file, all driven through argparse-based subcommands.

TECHNICAL SKILLS

Languages: JavaScript, Python, SQL (MySQL, PostgreSQL, SQLite), HTML/CSS

Frameworks & Libraries: React, Node.js, Flask, React Three Fiber, OpenCV

Developer Tools: Git, GitHub, VS Code, Pytest, Jest, Vitest, Postman, Bash, Powershell, Linux

Design Tools: Adobe Photoshop, Illustrator, InDesign
